

Vehicle weighing integrated system

DEVICES USED TO CONTROL TRANSPORT IN THE PLACE OF UNLOADING

GSW mobile application

After a RFID card has been hold against a telephone, the mobile application sends the GPS position and the card number to the server.

STX 2000 fixed reader with GPRS

After a RFID card has been hold against the reader, the card number is sent to the server.

GSW Remote Viewer Software

GSW Remote Viewer software is used to view data, including photographs, and to generate reports and lists. Data from numerous scales (branches) are collected in the central database.

The screenshot shows the 'Lista wazeni' (Weighing List) window. The interface includes a menu bar, search filters, and a main data table. A photo of a truck is displayed in a pop-up window.
